

JLM Iron Exterminator

750ml

Tough on Iron. Safe in Finish

Iron Exterminator is a powerful, multi-purpose cleaner designed to tackle brake dust, iron particles, and stubborn road grime with ease. Engineered for professionals and enthusiasts alike, this high-performance formula delivers deep-cleaning action without compromising existing sealants or protective coatings.

Perfect for regular maintenance or more intensive detailing sessions, it's safe for all rim types—including painted, polished, and chrome-plated finishes. With a reactive formula that changes colour as it works, you'll see the dirt dissolve before your eyes, leaving your wheels spotless and shining.

Benefits

- Removes brake dust, iron, and grime
- Safe on all wheel finishes
- Preserves coatings and sealants
- Colour-change cleaning action
- Rinses clean, no residue

Iron Exterminator provides deep cleaning for wheels and metal surfaces by effortlessly dissolving baked-on brake dust, iron fallout, and stubborn road grime. It is ideal for restoring alloy wheels to a factory-fresh appearance and for removing rust film from paintwork or bare metal. The pH-balanced formula is designed to clean effectively without stripping or damaging surfaces, making it safe for use on painted, anodised, chrome, and polished wheel finishes.

Unlike harsh cleaners, Iron Exterminator preserves existing wheel waxes, ceramic coatings, and sealants, ensuring that protective layers remain intact while contaminants are removed. As the reactive formula works, it changes colour to purple, providing a clear visual indication that iron particles and embedded dirt are being dissolved. After cleaning, the product rinses off easily with water, leaving no residue behind—only a clean, bright, and glossy result.

With Iron Exterminator, you benefit from professional-grade cleaning power that is tough on contamination yet gentle on your wheels and metal surfaces. It delivers the unmistakable JLM finish for those who demand outstanding results without compromise.

Recommended for:

For cleaning alloy wheels, painted and metal surfaces affected by brake dust, iron fallout, road grime, and light rust contamination.

How to use:

1. Preparation Ensure the wheels or surfaces are cool and dry before applying.
2. Application Spray generously onto the rims or affected areas.
3. Dwell Time Allow 3–5 minutes for the formula to react and change colour.
4. Agitate (if needed) Use a soft wheel brush to gently loosen stubborn contaminants.
5. Rinse thoroughly Rinse with a strong jet of water or pressure washer.
